The closest prior art references that relate to the claimed invention are Inoue'832, Pinkerton'049 and Aiken'303. The closest prior art references teach that it is known in the art to make and use metal particles. However, the prior art does not teach or suggest the collection of amorphous particles as claimed having specifically claimed composition..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
